127/PL 800F

FIXED BOLLARDS WITH COUNTERFRAME

The fixed 127/PL 800F PILOMAT have been designed and built with architectural appearence similar to that of the retractable PILOMAT bollards and therefore also allows the combined use of both versions.
Current models are the result of the dedication of more than 40 years in the field of access control and a twenty-year specialization in bollards.

GENERAL FEATURES

The fixed PILOMAT bollards are used in public or private areas in order to define or prevent the parking of vehicles, for preventing access to vehicles in pedestrian areas. These items, with a counterframe to wall, in addition to the architectural appearance of the automatic PILOMAT, allow the removal of the bollard in the event of such a removal being needed, or if impact has occurred.
