220/PF 600F

FIXED BOLLARDS WITH BRACKETS TO BE CEMENTED

The fixed 220/PF 600F PILOMAT have been designed and built with architectural appearence similar to that of the retractable PILOMAT bollards and therefore also allows the combined use of both versions. Current models are the result of the dedication of more than 40 years in the field of access control and a twenty-year specialization in bollards.

GENERAL FEATURES

The fixed PILOMAT are used in public or private areas in order to define or prevent the parking of vehicles, for preventing access to vehicles in pedestrian areas.These items can be cemented to the ground (in this case, the breakout resistance depends on the depth to which it is anchored into the ground) or be secured in place by chemical anchors in places where you cannot make the same anchor, or where masonry is already completed.
