

Bollard

Ref. 40 351X

Street Furniture
Classical Serie

Sineu Graff : Intelligent Design
for the town of tomorrow

➤ Presentation

The Classic series of bollards has been developed using our eco-conception approach. These cast iron bollards have been studied and designed optimally to minimise the use of raw materials and the energy required for manufacturing them. The regular grain of grey cast iron gives these pieces very high strength and a high finish quality.

This furniture has been designed and manufactured by Sineu Graff, experts in urban landscaping, in accordance with a sustainable development approach.

➤ Description

The body of the bollard is made up of two parts, the shaft and the top, which are differentiated by their contrasting black and white colours that can be seen easily by persons with impaired vision. The whole bollard is made of grey cast iron.

Cast-iron parts are produced in a foundry located close to our factory in France and are treated using our powder blast process (after cleaning and shot blasting, the parts are coated with a first coat of epoxy powder, and then with a second coat of polyester powder).

The two parts of the bollard are assembled using concealed screws.

4 Ø 12mm anchoring points (plate mounted version).

Delivered assembled.

Weight of bollard alone: 22kg.

➤ Colours

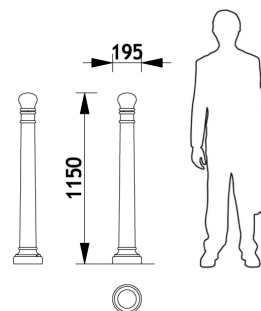

Colour shown:

Body: RAL 9017 Traffic black

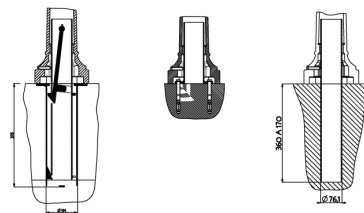

Cap: RAL 9010 Pure white

Colours to select from RAL (satin) or AKZO NOBEL (sand) charts.
