

rubber line

INVENTED AND PRODUCED IN FRANCE

Basing itself on an original creation by landscape architect Clément Willemin from the landscape architect and town planning practice BASE, Sineu Graff developed **rubber chair**.

Together, they designed this chair combining a **strengthened rubber seat and a steel structure**. The armchair, the 2-seat bench and the low table have been added to the **rubber chair** to create the **rubber line**, an innovative range which brings comfort into a whole new dimension in public spaces for which it is intended.

the designer's vision

LL The ideal public space always boils down to the living room. But a street never offers the same level of comfort as your home sofa surrounded by home comforts. Rubber Chair offers a seat that comfortably matches the living room sofa. It is really much wider than a private garden lounger. And you don't need to bring it in when it rains. Try it and contemplate the entertainment of the city (more interesting than most TV programmes!).

Behind this exceptional comfort is a 9 mm thick rubber sheet. Used currently in transports and in the industry, the rubber sheet perfectly matches here all body shapes and postures.

Clément Willemin

TECHNICAL DETAILS

The seating of the chairs and the 2-seat bench is made of **reinforced rubber** (9 mm thick). The 6 mm thick **machine-welded steel frame** includes **armrests** (depending on the model).

The **low table** is made of a **steel frame** (6 mm thick) and a **machine-welded steel tabletop** (4 mm thick). The parts are screwed together.

Steel parts are in **zinc coated S355 steel**.

FLEXIBLE MATERIAL

Street furniture is usually characterised by stiff materials.

With **rubber chair**, Clément Willemin and Sineu Graff are marketing an **original and innovative street furniture** which will surprise users by the **seat's comfort** provided by **rubber**.

Its strengthened structure offers excellent technical performances and high resistance.

It will allow it to withstand the outdoor weather and usage conditions of public spaces.
