Presentation

Petals furniture are designed to be installed standalone or in combination to offer breaks in areas usually busy and dedicated to mobility.

The leg and shelf of Petals are elegant and make reference to plants.

With its unique, creative and lively design, Petals bring intimate moments in the public realm.

Description

Petals are composed of one or more seats and/or shelves.

The seat and the shelf are composed of a metallic structure in zinc and powder coated steel and 22 x 95mm slats in raw exotic hardwood.

The metallic structure is made up of a high support, with 5 mm thick steel reinforcements, a Ø 60mm tube (3mm thick) and a 6mm thick baseplate with a gusset.

Ground sealing version: The Ø 60 mm leg is to be buried directly into the concrete foundation.

Base plate version: fixing with with 4x 12mm metallic anchors (4 holes Ø 14 mm in the plate) on a concrete foundation.

For optimal protection against rust and long-lasting performance, the steel elements are firstly treated by zinc plating. Then, according to our **Powder Blast process** (after cleaning and shot-blasting, the parts are coated with a first coat of epoxy powder, and a second polyester finishing powder coat).

The slats are fixed with wood screws (not visible).

Delivered assembled.
