

PETALS: COMPACT, MODULAR FURNITURE

Petals seating offers a wide range of design possibilities with a plant-like appearance, all curved and without obstructing the flow. With Petals, punctuate your spaces with furniture that is lively with its stem-shaped base and calming thanks to its floral inspiration.

PETALS AN INTIMATE BREAK

INVENTED AND PRODUCED IN FRANCE

PETALS

Creating **intimate** interludes in public spaces is the challenge taken up by the Petals range.

Proposing **compact furniture** that opens up a whole range of possibilities, so that every space in your city, street or park can be adorned with a few petals without hindering flows, that is the idea behind Petals.

Inspired by plants, Petals is the result of Arturo Erbsman's design work.

Petals, an intimate composition in a moving space

Designed in a **modular way**, PETALS varies from a simple layout to the most diverse combinations, providing the comfort, uses and dynamism of a new springtime in urban landscaping!

Combined with existing furniture, it accessorises single-purpose furniture, giving it a new lease on life and a new dimension.

Inclusive thanks to its curved tabletop, it leaves no one behind in this new life.

Compact, it fits in discreetly without obstructing the flow.

The legs and top of the **Petals** model lend **elegance** and **finesse** to the furniture and evoke the plant world. Petals create attractive **furniture that evokes calm, relaxation and well-being for users**.

Its unique, creative and lively design invites the creation of intimate interludes in a moving space.

PETALS: VERTICAL OPTIONS

Adaptable to existing fixtures, such as lighting posts or posts, you can also decorate its centre with a shade or a lighting post made by our partner Selux, bringing verticality and freshness to your compositions.

PETALS: URBAN PUNCTUATION!

Thanks to Petals and its compact design, you can enhance your unused spaces, your stationary fixtures such as lamp posts or posts, and offer users moments of relaxation in spaces that are usually thought of as transit areas.

Original because of its curves, these Petals units will soften often linear walkways punctuated with this single-purpose furniture.
