Elegant, versatile, flexible and for very high snow loads. The "Köln" system is an elegant all-rounder. Variable sizes and numerous options for rear and side walls – including printable tempered safety glass – provide weatherproof shelter for vehicles, equipment or comfortable recreation rooms. Custom colour coating, implemented in at least C4 medium quality, supports your CI concepts and design requirements. This "Alpine" variant is suitable for even higher snow loads. Ready assembled or as a kit.

- Hot-dip galvanised flat roof steel construction
- Side- and back walls available in different variants and configurations
- Custom painting in min. C4 medium quality
- High wind and snow loads
