

Park Bench KS3210

DS
DARBA
SPARS
anno 1891

The Park Bench KS3210 is a durable outdoor bench with a backrest, designed for parks, gardens, and public spaces. Manufactured from high-quality steel and natural wood, it combines comfort, robust construction, and a timeless design. The bench is available in powder-coated or hot-dip galvanized and powder-coated finishes (RAL colour of choice) and can be produced using different wood species to complement various outdoor environments.

For long-term corrosion protection, the steel frame is available either hot-dip galvanized (ISO 1461) or hot-dip galvanized and powder-coated in any RAL color. The seat and backrest are crafted from FSC-certified Linx pine, ensuring durability and low maintenance under varied climate conditions.

The bench is supplied disassembled, the steel side elements are delivered separately and must be bolted to the main frame during installation.

Specifications:

- Height: 789 mm
- Width: 518 mm
- Length: 1800 mm

Steel finish options:

- Hot-dip galvanized (ISO 1461)
- Hot-dip galvanized (ISO 1461) and powder-coated
