

Park Bench KS3200

The Park Bench KS3200 is a durable outdoor bench designed for parks, gardens, and public spaces. Made from high-quality steel and natural wood, it combines a robust construction with a modern design, ensuring comfort and long-lasting performance in all weather conditions. The bench is available in powder-coated or hot-dip galvanized and powder-coated finishes (RAL colour of choice).

For long-term corrosion protection, the steel frame is available either hot-dip galvanized (ISO 1461) or hot-dip galvanized and powder-coated in any RAL color. The seat and backrest are crafted from FSC-certified Linux pine, ensuring durability and low maintenance under varied climate conditions.

The bench is supplied disassembled, the steel side elements are delivered separately and must be bolted to the main frame during installation.

Specifications:

- Height: 450 mm
- Width: 360 mm
- Length: 1800 mm
