

Park Bench KS1800

The Park Bench KS1800 is a durable bench with a clean, minimalist design. Its key advantage is the hidden fastening system, which keeps all fixings concealed and gives the bench a neat, seamless appearance.

The 4 mm thick steel frame is available either hot-dip galvanized (ISO 1461) or hot-dip galvanized and powder-coated in any RAL color.

The bench is supplied disassembled, the steel side elements are delivered separately and must be bolted to the main frame during installation.

Specifications:

- Length: 1800 mm
- Height: 450 mm
