Optima planter
Ref. 299 534

Street Furniture
Optima Range

Sineu Graff : Intelligent Design
for the town of tomorrow

Presentation

The Optima planter is made of wood and has been eco-designed to require a smaller number of steel and wooden parts.

An optimised planter, which is elegant and simple, and plays on materials and textures.

This piece of street furniture is designed to be in harmony with all types of architecture and is distinguished by its high quality and precise assembly.

This furniture has been designed and manufactured by Sineu Graff, experts in urban landscaping, in accordance with a sustainable development approach.

Description

The planter is made up of:

- 4 posts (section 50x50mm, 3mm thick) in painted galvanized steel
- 4 M22 stainless steel adjustable feet
- 4 U-shaped upper angle irons (section 19x50mm, 4mm thick) in painted galvanized steel
- 4 U-shaped lower angle irons (section 38x56mm, 4mm thick)
- 4 panels, each made of 7 wooden slats (section 160x35mm) and two U-shaped slat supports (section 40x9mm, 3mm thick) in painted galvanized steel
- 1 fixed handling planting box with 4 M22 stainless steel adjustable feet.

After the application of a flow coat, the wood is coated with solvent-free water-based emulsion stain.

The wood used is certified and sourced from well-managed forests.

Steel parts are zinc plated, then they undergo our powder blast process (after cleaning and shot blasting, they are coated with a first coat of epoxy powder, and then with a second coat of polyester powder).

The planter has removable fronts, making it possible to handle the planting boxes with a lift truck.
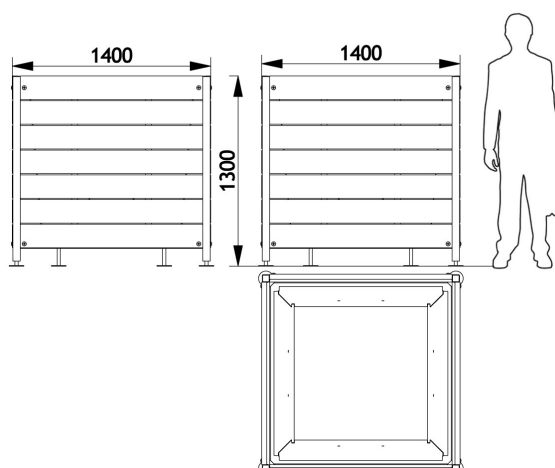

All our planters are compatible with the Sineu Flor system.

Capacity: 1080 litres, including 210-litre reserve.

Weight of planter alone: 179 kg.

Delivered assembled.
