Sineu Graff works with local authorities to improve users' life quality : transform public space into a destination and not only a place to pass by. Landscape and urbanity are features that encourage lingering.

In our role as designer and manufacturer, these features are expressed by comfort, ergonomics, design

CONVERSATION

Comfort & design for a city to live in

and quality. Together with the French architects Alhabegoithy & Bayle, we designed *Conversation*, a seat that encourages users to linger, take a seat, contemplate, chat or relax in these peaceful places where people share their time.

Olivier FINANCE
Sales & Marketing Manager

CONVERSATION

The architects Alhabegoithy & Bayle revisit the traditional public park seat to create the ***Conversation range, an elegant and timeless line.***

The curve and the ergonomics of this seat have been designed to offer optimal comfort to the user. **The backrest fits perfectly with the curve of the user's back:** the assembly of two sections of wooden battens, their smooth shape and the regular intervals create a perfect curve.

The comfort of this seat attracts the user to sit down for extended relaxed moments.

The legs and the curve of the backrest have been designed to enable the *Conversation* seat to be **installed on its own, back to back or in rows.** Thus, it sketches lines, symmetries and invents new standards in the urban landscape.

A **wide bench, a narrow bench and a lounger** are also available in this range, to vary rhythms, uses and postures.

Conversation gives a sober and pure look to the urban space.

Belfort (France) - Armes square

Beauvais (France) - Jeanne Hachette square

3-place seat - Ref. 10 0060

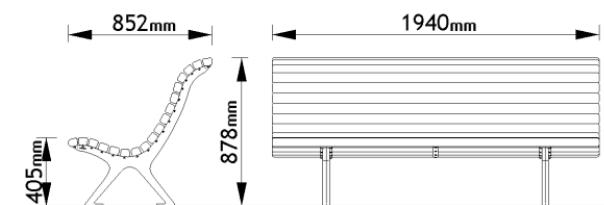

Hardwood & cast iron - 4 fixing points

Weight: 105 kg
